

# CDGMS Wolves Drag Racing Program

## Sponsorship Opportunities

To Interested Sponsors:

The CDGMS Drag Racing Program has been successfully providing a unique and valuable experience for our students for the past four years. Our program is completely self-sufficient relying solely on funds that we generate from fundraising, as funding is not available within the school budget.

We welcome your generous support in the following areas.

- funding for operating expenses
- use of equipment
- provision of parts, supplies, and services

### Funds for Operating Expenses:

This year we are looking to receive sponsorship in this area of approximately \$10,000 dollars. These funds would cover our operational expenses for the 10 -day race season as follows:

**1) Teacher on Call ( TOC ) coverage - \$4000**

For 2 teachers who supervise the students at the track each race day.

**2) Entrance fees - \$1000**

Our entrance fees average \$100 dollars each race day - \$28 per car (we race two cars) and \$5 per person each time we go out.

**3) Supplies and Replacement parts - \$6000-\$8000**

It is estimated that it costs an average of \$25 a run in wear and tear for each Jr. Dragster. We average about 6 to 8 runs per car each race day. This works out to \$600-\$800 dollars each race day. At present, our older dragster needs a clutch which will cost us \$800 US. We need to have funds set aside for these large car part purchases in order to keep the cars running.

### Purchase or Use of Support Equipment

- **Use of an 18-21 foot tandem axle flat bed trailer.**

At present we are using a refurbished tent trailer to carry our cars. The trailer is too short and the cars hang off of the trailer. Our golf cart is carried in the back of a pickup truck. We would like to have a trailer that could carry both of our cars, our golf cart, and our tools. We would like to be able to borrow a trailer on our ten race days, picking it up at 7:00 am and returning it at 5:00 pm.

- **Purchase a reverse back seat for our golf cart - \$700 to \$800**

We use the golf cart to retrieve the race cars and drivers after they have made a pass. Currently, the drivers must stand on the back of the golf cart. We would like to purchase Club Car's back seat so that the drivers can safely sit while returning to the pits. This purchase would greatly enhance the stability of the cart when transporting four people (cart driver, pit crew member and two race car drivers).

## Parts, Supplies, Services, etc:

The following is a breakdown of parts and services we need:

\*\*All prices are in US dollars and are available from JR. Race Car (for reference).

For the original junior dragster::

- Frame reinforcement (TIG welding)
- New clutch - Shockwave clutch **\$785.00** (limited time offer - JR. Race Car)
- Jackshaft Support **\$190.00**
- New front wheels and tires, complete set **\$389.00**
- Rear tires complete with wheels **\$440.00/pair** or **\$125.00** for each tire only

For the new junior dragster:

- Replacement of front steering bolts
- Seat pad (right now it is bare metal) **\$74.00**
- Jackshaft Support **\$190.00**

General supplies and equipment:

- oil (synthetic)
- fuel (alcohol)
- lockable storage cabinets for equipment
- tools (portable air tank, cordless drill, gear wrench set, etc.)
- safety equipment (must be updated every two years - expiration date)

## Benefits of Sponsorship

- Sponsors will receive a charitable receipt issued by the School Board once any sponsorship funds have been directed to the appropriate school account.
- To help our valued sponsors, we are ready to offer a number of advertising benefits including mention in our school newsletters and highlight on our school web page.
- We are also prepared to offer our two race cars and our golf cart tow vehicle as blank canvases for your company logos. These options could range from a simple company decal to painting an entire car using your company's colours and decals. We are open to any suggestions you may have.

Chief Dan George Racing Team would like to thank you for taking the time to consider sponsorship of our program. For some students this opportunity could be the only thing that keeps them interested in school and for others it is the beginning of a life time love affair with cars and mechanics. It is an amazing feeling to see the wide eyed expressions on our students' faces as they round their car off of the track at the quarter mile and realize that they have made a 50 mph. pass of the track at two inches above the pavement. This club gives our students opportunities they will never forget in a controlled and safe environment. Your help is essential. The teachers and students involved would like to thank you for helping us keep this very important club running.
